

SAIKRISHNA MADALA

Full Stack Developer

saikrishna26031098@gmail.com | +1 213-436-3396 | New York, USA | [LINKEDIN](#)

SUMMARY

Detail-oriented Full Stack Developer with 5 years of experience designing, developing, and deploying scalable web and cloud applications using Java, Spring Boot, React, and AWS. Skilled in building microservices, REST/GraphQL APIs, and implementing CI/CD pipelines across cloud environments. Experienced in both frontend and backend performance optimization, database design, and secure authentication workflows. Adept at collaborating in Agile/Scrum teams to deliver high-quality, user-centric products. Passionate about creating efficient, maintainable, and modern full-stack solutions that drive business impact.

WORK EXPERIENCE

Amazon

June 2024 – Present

Full Stack Developer

New York, NY

- Contributed to the design and delivery of Java (Spring Boot)-based microservices and AWS Lambda workflows for the AWS CloudEdge Platform, improving API throughput by 40% and reducing operational costs through serverless and distributed architecture.
- Developed and optimized GraphQL and RESTful APIs using AWS AppSync and API Gateway, enabling low-latency synchronization for 700k+ concurrent users and ensuring high system reliability under load.
- Implemented secure authentication mechanisms leveraging Amazon Cognito, OAuth2, and JWT, reducing unauthorized access incidents by 95% and aligning with secure SDLC practices.
- Automated full-stack infrastructure provisioning via Terraform and AWS CloudFormation, cutting environment setup time from 4 hours to 15 minutes and accelerating CI/CD workflows.
- Integrated backend data layers with Amazon DynamoDB, Aurora PostgreSQL, and ElastiCache (Redis), achieving 60% faster query execution and enhancing hybrid data model efficiency.
- Built CI/CD pipelines using GitHub Actions and AWS CodePipeline, halving deployment cycles and boosting automated test coverage to eliminate manual release errors.
- Modernized front-end architecture with React (Hooks + Context API), TypeScript, and Tailwind CSS, improving initial load performance by 30% and ensuring consistent UX validated through Jest, Playwright, and Cypress tests.
- Supported offline-first data synchronization using AWS Amplify DataStore, improving user engagement by 22% in low-connectivity regions.
- Enhanced observability by integrating CloudWatch, AWS X-Ray, and OpenTelemetry, reducing critical API incidents by 70% through proactive tracing and alerting.
- Collaborated in an Agile environment to deliver 10+ major features per quarter, maintaining 90%+ unit test coverage via TDD and coordinating efforts across teams using Jira, Confluence, and GitLab.

Accenture

Aug 2019 - Apr 2022

Full Stack Developer

India

- Contributed to building and maintaining scalable web applications using Angular and Spring Boot, supporting clients across banking, telecom, and retail domains, resulting in a 25% improvement in application performance.
- Assisted in developing and testing RESTful APIs with Swagger and OpenAPI 3.0, improving integration reliability and reducing API-related defects by 30%.
- Supported database design and performance tuning in MySQL, writing optimized queries, stored procedures, and triggers that reduced query execution time by 40%.
- Helped implement Kafka-based event streaming pipelines to handle large data volumes, improving system responsiveness.
- Containerized backend applications with Docker and participated in deployment on Azure Kubernetes Service (AKS), reducing deployment errors by 50%.
- Contributed to implementing secure access control using RBAC, API rate limiting, and Azure Key Vault, strengthening security compliance and reducing unauthorized access attempts.
- Assisted in setting up and maintaining Azure DevOps CI/CD pipelines with integrated SonarQube scans, increasing code quality scores by 35%.
- Deployed front-end builds on Azure App Services and configured Nginx for routing, caching, and performance optimization, improving load speed by 30%.
- Integrated Tableau dashboards to automate client reporting and operational analytics, reducing manual reporting efforts by 70%.
- Participated in Agile/Scrum activities daily stand-ups, sprint planning, and code reviews collaborating with cross-functional teams to deliver over 80% of sprint goals on time.
- Built and enhanced enterprise-grade web applications using Angular and Spring Boot for clients in banking, telecom, and retail.

EDUCATION

Auburn University at Montgomery Alabama, USA
Master’s in computer science| GPA: 3.8
Sreyas Institute of Engineering and Technology Hyderabad, INDIA
Bachelor of Technology, Computer Science Engineering

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React, Next.js, Node.js, Express, Java, Spring Boot, Django, GraphQL covering both frontend and backend development.

Frontend & UI: HTML5, CSS3 (Flexbox, Grid), component-based design, responsive layouts, cross-browser compatibility, modern bundlers (Webpack, Vite, Babel), Figma for design collaboration, performance optimizations (code splitting, Core Web Vitals).

Backend & Server-Side: RESTful API design, GraphQL, WebSockets (Socket.io), server-side rendering, microservices architecture, Redis caching, PostgreSQL and MySQL optimization, Flask, authentication/authorization workflows, JSON data interchange.

Databases & Caching: PostgreSQL, MySQL, MongoDB (NoSQL), Redis; skilled in SQL optimization, indexing, ACID transactions, data classification, choosing DB paradigms.

Cloud & DevOps: AWS (EKS, Lambda, RDS, CloudFormation), GCP (App Engine, Cloud SQL, GCS), Firebase, Docker, Kubernetes, Terraform, Ansible, Bash scripting, Linux administration, serverless architectures (Lambda or Cloud Functions), CI/CD pipelines (GitHub Actions, Jenkins).

Testing & QA: Unit, integration, and test-driven development using Jest, Mocha, JUnit, Cypress, Postman; experience with automated testing frameworks and maintaining regression coverage.

Security & Best Practices: OAuth 2.0, JWT, RBAC, OWASP secure coding, input validation, software security best practices, XSS or SQL injection prevention.

Version Control & Collaboration: Git, GitHub, GitLab, Agile (Scrum or Kanban), Jira, Confluence; effective teamwork, code reviews, cross-functional collaboration, and mentoring.

Soft Skills & Problem Solving: Critical thinking, advanced analytics, adaptability, entrepreneurial mindset, effective verbal and written communication, project management, collaboration, and time management for navigating complex and fast-changing environments.
