PROFESSIONAL SUMMARY

Full-Stack & Cloud Software Engineer with 4+ years of experience building scalable enterprise solutions in Java/Spring Boot, React, Angular, AWS, and Azure. Delivered high-impact platforms that cut release cycles by 70% and scaled to improve concurrent users. Skilled in REST/SOAP APIs, CI/CD automation, Docker/Kubernetes, and designing secure, high-performance systems.

SKILLS

Front-end Technologies: React JS, Angular, TypeScript, HTML, CSS, JavaScript, Bootstrap, jQuery, AJAX, Redux, Figma.

Back-end Technologies: Java, Spring Boot, Hibernate, JPA, REST, SOAP APIs, Maven, Gradle, Node JS, Bash Script, Microservices, XML, JSON

Database: Postgres SQL, MySQL, MongoDB, Oracle, NoSQL, Microsoft SQL Server, CockroachDB

DevOps & Tools: Docker, Kubernetes, Git, JIRA, CI/CD Pipelines, Tomcat Apache, Swagger, Postman, Jenkins, GitLab, Kafka, Rabbit MQ

Cloud Platforms: AWS, Azure

Methodologies: Agile Methodologies, Scrum, SDLC

Testing: JUnit, Selenium, Mockito

PROFESSIONAL EXPERIENCE

JEFFERIES

New York, USA

Software Development Engineer

March 2024–Present

- Engineered a React and Spring Boot microservices platform delivering real-time market insights, enabling analysts to make faster decisions.
- Built and integrated secure RESTful APIs connecting React dashboards to backend services, improving data flow efficiency by 20%
- Deployed and optimized Spring Boot microservices on AWS EKS (Kubernetes) to ensure high availability and low latency, supporting high-volume financial transactions without service degradation
- Implemented event-driven communication using Apache Kafka and gRPC for inter-service messaging, reducing average service response time by 35%, and integrated SonarQube code quality checks into Jenkins CI/CD pipelines, cutting post-deployment defects by 18% and improving maintainability scores
- Collaborated closely with DevOps, QA and Business teams to align requirements, and ensure smooth project delivery through clear communication and regular reviews

POPCORNAPPS

Hyderabad, India

Software Developer,

October 2019– May 2022

- Developed and deployed an Angular and Spring Boot CRM-integrated E-commerce solution on Azure Functions, enhancing responsiveness and improving the overall customer shopping experience
- Gathered API requirements and delivered RESTful and SOAP APIs documented in Swagger to ensure seamless system integration
- Built and tested backend services with JUnit and Mockito, strengthening code quality and reducing production defects by 15% across billing, marketing, and CRM modules
- Containerized applications with Docker and Kubernetes, streamlining deployments and cutting environment setup time by 30% for both UI and backend teams
- Enhanced Jenkins CI/CD pipelines with Selenium, supporting continuous delivery and enabling a smooth AWS cloud migration for higher platform reliability

EDUCATION

Auburn University at Montgomery

Alabama, USA

Master's in computer science | GPA: 3.8

June 2022–December2023

Sreyas Institute of Engineering and Technology

Hyderabad, INDIA

Bachelor of Technology, Computer Science Engineering

August 2015- June 2019
